QUICK GUIDE

COMPASS GPS

NAVIGATION GUIDE

Introduction

This guide explains how to navigate in COMPASS GPS. The following main elements are described: title bar, top navigation bar, workspace bar, and left navigation bar.

Title bar

To the left in the title bar you find the WIDEX COMPASS GPS logo, which shows that you have opened the COMPASS GPS fitting software from WIDEX.
In the middle of the title bar you can see the selected client and their birthday (and age in brackets). To the far right, you can minimize, maximize or close the program, just like any other Microsoft Windows program.

Top navigation bar

The top navigation bar consists of the global navigation, which is divided into different themes, and the global tools that are accessible regardless of the theme you are working in.

Global navigation

The different themes under global navigation give you access to the main areas of COMPASS GPS. When a theme is active it is marked with a blue color, otherwise it is black. You have access to all themes if COMPASS GPS is connected to a hearing aid or if a hearing aid is selected.

Global tools

The global tools are Cloud-based services, SoundPlayer, Save, Print, Help and End Session. Use these tools to save the fitting, print documents or access the Help menu (where you have several options). Finally, you can close COMPASS GPS from the Top navigation bar; this choice also saves data in your database and in the hearing aids.

Workspace bar

The workspace bar is situated underneath the top navigation bar, and here you can see whether you have selected and/or connected to a hearing aid. You can also see which programming interface you have selected. Depending on the fitting, you will sometimes see a notification icon – if you hold your mouse pointer over the icon, you are notified about possible issues regarding the present fitting.

To the far right of the workspace bar you find the workspace tools, such as the Mute/unmute (both right and left hearing aid) and Reset functions, which contains a dropdown list from which you can choose between several reset functions.

Left navigation bar

The left navigation bar consists of the following:

- The Program starter, which is situated at the top of the left navigation bar (in the FINE TUNING and LOG themes).
- Tools that belong to the theme you have selected in the top navigation bar. For instance, if you select FINE TUNING from the top navigation bar, the primary tools are shown in the upper part of the the left navigation bar, just below the program starter. Underneath the primary tools you find the secondary tools (MORE TOOLS). An example is shown on the right.
- Hearing aid series logo for the hearing aids you have currently selected is visible at the bottom of the left navigation.

For further information and guidance, open the Help system from the top navigation bar in the COMPASS GPS program, or by pressing the F1 button on your keyboard.
