#### For clinician use only

Total THI Score: (number of 'Yes' responses x 4) + (number of 'Sometimes' responses x 2) = \_\_\_\_\_

This questionnaire is reproduced with the kind permission of Craig Newman, Ph.D.

The presence of perceived tinnitus handicap is based on the total THI score. The total THI score is further classified as follows:

- 0 16: Slight or no handicap (Grade 1)
- 18 36: Mild handicap (Grade 2)
- 38 56: Moderate handicap (Grade 3)
- 58 76: Severe handicap (Grade 4)
- 78 100: Catastrophic handicap (Grade 5)

This questionnaire is reproduced with the kind permission of Craig Newman, Ph.D.
